

## Integrated quality policy

### Quality Environmental protection and Safety

Our quality policy determines the general common rules used in "Golan Renewable Industries" to ensure continuous improvement of the company's activities while being committed to maintaining quality based on risk and opportunities management and **safety** as well as **environmental** protection.

- "Golan Renewable Industries" believes that sustaining an "integrated quality management system", based on quality management standards, is an important means to achieve the company's objectives and targets.
- "Golan Renewable Industries" policy, procedures, guidelines and specifications, help maintain the level of quality and environmental objectives in compliance with the standards, laws and regulations to which the organization certified or/and obliged to.
- "Golan Renewable Industries" is committed to complying with the requirements of any regulation or any other requirement in the field of safety and environmental protection.
- "Golan Renewable Industries" is constantly improving performance in the areas of quality, safety and environment through an integrated management system.
- "Golan Renewable Industries" provides high quality products that are produced and tailored to customer requirements, while providing high service standard and customer support as well as meeting all commercial obligations.
- "Golan Renewable Industries" refers to its employees as most valuable asset, assuring the company's strength and success. "Golan Renewable Industries" employs skilled and reliable workers and does everything to ensure their **safety**, enhancing their knowledge and training and caring for their social welfare.
- "Golan Renewable Industries" is well aware, that meeting the objectives of product quality, reliability and service, **environmental protection**, **occupational safety and hygiene** is depending on the actual involvement and functioning of its employees.
- "Golan Renewable Industries" believes in the importance of carrying out effective product and process design to ensure quality production and achieve customer's satisfaction, while preserving the **environment**.
- "Golan Renewable Industries" sees in its suppliers, contractors and employees business partners and is developing close relationships with them to improve its capability to meet the requirements.

This policy will be translated into quality and measurable objectives to achieve continuous improvement and to encourage practical application of these policies. "Golan Renewable Industries" will take all necessary managing, engineering and technological measures to improve the working environment of the employees, to secure their **safety** and to preserve the **environment**.
